SUBJECT INDEX

Active control
Time-Delay Effect on Dynamic Response of Actively Controlled Structures, Surjit S. Dhillon and William C. Lennox, AS Oct. 92, p450-464.

Adhesive bonding
Effects of Bonding Stiffness on Thermal Stresses in Sandwich Panels, R. Hussein, P. Fazio and K. Ha, AS Oct. 92, p480-490.

Aerodynamics
Transverse Shear Effect on Flutter of Composite Panels, Le-Chung Shiau and Jing-Tang Chang, AS Oct. 92, p465-479.

Aircraft technology
Transverse Shear Effect on Flutter of Composite Panels, Le-Chung Shiau and Jing-Tang Chang, AS Oct. 92, p465-479.

Algorithms
Modal Identification Algorithm with Unmeasured Input, C. F. Cremona and J. A. Brandon, AS Oct. 92, p442-449.

Aluminum
Projectile Shape and Material Effects in Hypervelocity Impact Response of Dual-Wall Structures, William P. Schonberg and Kent Darzi, AS Oct. 92, p405-424.

Anchors
Regolith Mechanics, Dynamics, and Foundations, Mohammed M. Ettouney and Haym Benaroya, AS Apr. 92, p214-229.

Anisotropy
Postbuckling Response Simulations of Laminated Anisotropic Panels, Ahmed K. Noor, James H. Starnes, Jr. and W. Allen Waters, Jr., AS July 92, p347-368.

Architecture
Technical Issues for Lunar Base Structures, Brent Sherwood and Larry Toups, AS Apr. 92, p175-186.

Astrogeology
Behavior of Compacted Lunar Simulants Using New Vacuum Triaxial Device, Chandra S. Desai, Hamid Saadatmanesh and Thomas Allen, AS Oct. 92, p425-441.

Astronomy
Structural Design of Lunar Radio Telescope Using Interactive CAD, Ferhat Akgul, Walter H. Gerstle and Stewart W. Johnson, AS Jan. 92, p12-23.

Basalt
Indigenous Resource Utilization in Design of Advanced Lunar Facility, Larry S. Bell, Michael G. Fahey, Todd K. Wise and Paul C. Spana, AS Apr. 92, p230-247.

Beams
Vibration Control of Beams with Embedded Smart Composite Material, M. Arockiasamy, P. S. Neelakanta and G. Sreenivasan, AS Oct. 92, p492-498.

Bending
Analysis of Thick Circular Plates Undergoing Large Deflections, M. Gorji, J. A. Abuyan and K. S. Y. Li, AS Jan. 92, p138-153.

Blasting
Use of Explosives on the Moon, Richard D. Dick, William L. Fourney, Deborah J. Goodings, Chaun-Ping Lin and Leonhard E. Bernold, AS Jan. 92, p59-69.

Buckling
Design/Control Optimization of Cross-Ply Laminates under Buckling and Vibration, J. M. Sloss, I. S. Sadek, J. C. Bruch, Jr. and S. Adali, AS Jan. 92, p127-137.

Postbuckling Response Simulations of Laminated Anisotropic Panels, Ahmed K. Noor, James H. Starnes, Jr. and W. Allen Waters, Jr., AS July 92, p347-368.

Building codes
Design and Construction Considerations for Lunar Outpost, H. Benaroya and M. Ettouney, AS July 92, p261-273.

Building design
Overview of Existing Lunar Base Structural Concepts, Task Committee on Lunar Base Structures, AS Apr. 92, p159-174.

Buildings
Concept Evaluation Methodology for Extraterrestrial Habitats, Richard M. Drake and Philip J. Richter, AS July 92, p282-296.

Cables
Cable Structures and Lunar Environment, Mohammed Ettouney, Haym Benaroya and Nissim Agassi, AS July 92, p297-310.

Centrifuge
Modeling Effects of Chemical Explosives for Excavation on Moon, Deborah J. Goodings, Chaun-Ping Lin, Richard D. Dick, William L. Fourney and Leonhard E. Bernold, AS Jan. 92, p44-58.

Use of Explosives on the Moon, Richard D. Dick, William L. Fourney, Deborah J. Goodings, Chaun-Ping Lin and Leonhard E. Bernold, AS Jan. 92, p59-69.

Compacted soils
Behavior of Compacted Lunar Simulants Using New Vacuum Triaxial Device, Chandra S. Desai, Hamid Saadatmanesh and Thomas Allen, AS Oct. 92, p425-441.

Compatibility
Model Correction via Compatible Element Method, De-Wen Zhang and F. S. Wei, AS July 92, p337-346.

Composite materials

Postbuckling Response Simulations of Laminated Anisotropic Panels, Ahmed K. Noor, James H. Starnes, Jr. and W. Allen Waters, Jr., AS July 92, p347-368.

Vibration Control of Beams with Embedded Smart Composite Material, M. Arockiasamy, P. S. Neelakanta and G. Sreenivasan, AS Oct. 92, p492-498.

Composite structures

Design/Control Optimization of Cross-Ply Laminates under Buckling and Vibration, J. M. Sloss, I. S. Sadek, J. C. Bruch, Jr. and S. Adali, AS Jan. 92, p127-137.

Simultaneous Design and Control of Stiffened Laminated Composite Structures, Luis Mesquita and Manohar P. Kamat, AS Jan. 92, p111-126.

Transverse Shear Effect on Flutter of Composite Panels, Le-Chung Shiau and Jing-Tang Chang, AS Oct. 92, p465-479.

Computer applications

Structural Design of Lunar Radio Telescope Using Interactive CAD, Ferhat Akgul, Walter H. Gerstle and Stewart W. Johnson, AS Jan. 92, p12-23.

Computerized design

Structural Design of Lunar Radio Telescope Using Interactive CAD, Ferhat Akgul, Walter H. Gerstle and Stewart W. Johnson, AS Jan. 92, p12-23.

Constructibility

Overview of Existing Lunar Base Structural Concepts, Task Committee on Lunar Base Structures, AS Apr. 92, p159-174.

Construction

Behavior of Compacted Lunar Simulants Using New Vacuum Triaxial Device, Chandra S. Desai, Hamid Saadatmanesh and Thomas Allen, AS Oct. 92, p425-441.

Construction of Pressurized, Self-Supporting Membrane Structure on Moon, Philip Y. Chow, AS July 92, p274-281.

Engineering Issues for Early Lunar-Based Telescopes, Stewart W. Johnson, Jack O. Burns, Koon Meng Chua and John P. Wetzel, AS July 92, p323-336.

Indigenous Resource Utilization in Design of Advanced Lunar Facility, Larry S. Bell, Michael G. Fahey, Todd K. Wise and Paul C. Spana, AS Apr. 92, p230-247.

Technical Issues for Lunar Base Structures, Brent Sherwood and Larry Toups, AS Apr. 92, p175-186.

Construction materials

Indigenous Resource Utilization in Design of Advanced Lunar Facility, Larry S. Bell, Michael G. Fahey, Todd K. Wise and Paul C. Spana, AS Apr. 92, p230-247.

Construction methods

Concept Evaluation Methodology for Extraterrestrial Habitats, Richard M. Drake and Philip J. Richter, AS July 92, p282-296.

Mechanical Equipment Requirements for Inflatable Lunar Structures, James M. Hines, Craig E. Miller and Richard M. Drake, AS Apr. 92, p248-256.

Construction planning

Construction of Pressurized, Self-Supporting Membrane Structure on Moon, Philip Y. Chow, AS July 92, p274-281.

Design and Construction Considerations for Lunar Outpost, H. Benaroya and M. Ettouney, AS July 92, p261-273.

Control

Design/Control Optimization of Cross-Ply Laminates under Buckling and Vibration, J. M. Sloss, I. S. Sadek, J. C. Bruch, Jr. and S. Adali, AS Jan. 92, p127-137.

Control systems

Isssues in Developing Control Zones for International Space Operations, Blair A. Nader and Kumar Krishen, AS Oct. 92, p387-404.

Simultaneous Design and Control of Stiffened Laminated Composite Structures, Luis Mesquita and Manohar P. Kamat, AS Jan. 92, p111-126.

Cooperation

Isssues in Developing Control Zones for International Space Operations, Blair A. Nader and Kumar Krishen, AS Oct. 92, p387-404.

Damping

Vibration Control of Beams with Embedded Smart Composite Material, M. Arockiasamy, P. S. Neelakanta and G. Sreenivasan, AS Oct. 92, p492-498.

Data analysis

Optimizing Launch-on-Time Probability, George W. Morgenthaler, AS July 92, p369-386.

Deflection

Analysis of Thick Circular Plates Undergoing Large Deflections, M. Gorji, J. A. Abuyan and K. S. Y. Li, AS Jan. 92, p138-153.

Delay time

Optimizing Launch-on-Time Probability, George W. Morgenthaler, AS July 92, p369-386.

Time-Delay Effect on Dynamic Response of Actively Controlled Structures, Surjit S. Dhillon and William C. Lennox, AS Oct. 92, p450-464.

Design

Design and Construction Considerations for Lunar Outpost, H. Benaroya and M. Ettouney, AS July 92, p261-273.

Design criteria

Technical Issues for Lunar Base Structures, Brent Sherwood and Larry Toups, AS Apr. 92, p175-186.

Domes, structural

Mechanical Equipment Requirements for Inflatable Lunar Structures, James M. Hines, Craig E. Miller and Richard M. Drake, AS Apr. 92, p248-256.

Dynamic response
Modal Identification Algorithm with Unmeasured Input, C. F. Cremona and J. A. Brandon, AS Oct. 92, p442-449.

Time-Delay Effect on Dynamic Response of Actively Controlled Structures, Surjit S. Dhillon and William C. Lennox, AS Oct. 92, p450-464.

Eigenvalues
Graph-Theory Approach to Eigenvalue Problem of Large Space Structures, A. S. S. R. Reddy, AS Jan. 92, p70-78.

Energy budget
BEST: New Satellite Mission Dedicated to Tropical System Energy Budget, M. Orgeret, AS Jan. 92, p1-11.

Engineering profession
Engineering Issues for Early Lunar-Based Telescopes, Stewart W. Johnson, Jack O. Burns, Koon Meng Chua and John P. Wetzel, AS July 92, p323-336.

Environmental factors
Design and Construction Considerations for Lunar Outpost, H. Benaroya and M. Ettouney, AS July 92, p261-273.

Framework for Evaluation of Lunar Base Structural Concepts, Haym Benaroya and Mohammed Ettouney, AS Apr. 92, p187-198.

Overview of Existing Lunar Base Structural Concepts, Task Committee on Lunar Base Structures, AS Apr. 92, p159-174.

Evaluation
Framework for Evaluation of Lunar Base Structural Concepts, Haym Benaroya and Mohammed Ettouney, AS Apr. 92, p187-198.

Excavation
Modeling Effects of Chemical Explosives for Excavation on Moon, Deborah J. Goodings, Chaun-Ping Lin, Richard D. Dick, William L. Fourney and Leonhard E. Bernold, AS Jan. 92, p44-58.

Use of Explosives on the Moon, Richard D. Dick, William L. Fourney, Deborah J. Goodings, Chaun-Ping Lin and Leonhard E. Bernold, AS Jan. 92, p59-69.

Explosion effects
Modeling Effects of Chemical Explosives for Excavation on Moon, Deborah J. Goodings, Chaun-Ping Lin, Richard D. Dick, William L. Fourney and Leonhard E. Bernold, AS Jan. 92, p44-58.

Use of Explosives on the Moon, Richard D. Dick, William L. Fourney, Deborah J. Goodings, Chaun-Ping Lin and Leonhard E. Bernold, AS Jan. 92, p59-69.

Facilities
Overview of Existing Lunar Base Structural Concepts, Task Committee on Lunar Base Structures, AS Apr. 92, p159-174.

Technical Issues for Lunar Base Structures, Brent Sherwood and Larry Toups, AS Apr. 92, p175-186.

Finite element method
Transverse Shear Effect on Flutter of Composite Panels, Le-Chung Shiau and Jing-Tang Chang, AS Oct. 92, p465-479.

Finite elements
Model Correction via Compatible Element Method, De-Wen Zhang and F. S. Wei, AS July 92, p337-346.

Support Structures for High-Resolution Optical Systems, Ralph M. Richard and Daniel Vukobratovich, AS Jan. 92, p24-43.

Flexure
Support Structures for High-Resolution Optical Systems, Ralph M. Richard and Daniel Vukobratovich, AS Jan. 92, p24-43.

Flutter
Transverse Shear Effect on Flutter of Composite Panels, Le-Chung Shiau and Jing-Tang Chang, AS Oct. 92, p465-479.

Foundations
Engineering Issues for Early Lunar-Based Telescopes, Stewart W. Johnson, Jack O. Burns, Koon Meng Chua and John P. Wetzel, AS July 92, p323-336.

Regolith Mechanics, Dynamics, and Foundations, Mohammed M. Ettouney and Haym Benaroya, AS Apr. 92, p214-229.

Frames
Concurrent Optimization of Large Structures. I: Algorithms, Hojjat Adeli and Osama Kamal, AS Jan. 92, p79-90.

Concurrent Optimization of Large Structures. II. Applications, Hojjat Adeli and Osama Kamal, AS Jan. 92, p91-110.

Geometry
Geometric Modeling of Inflatable Structures for Lunar Base, Paul S. Nowak, Willy Z. Sadeh and Loretta A. Morroni, AS July 92, p311-322.

Graph theory
Graph-Theory Approach to Eigenvalue Problem of Large Space Structures, A. S. S. R. Reddy, AS Jan. 92, p70-78.

Gravity
Regolith Mechanics, Dynamics, and Foundations, Mohammed M. Ettouney and Haym Benaroya, AS Apr. 92, p214-229.

Identification
Modal Identification Algorithm with Unmeasured Input, C. F. Cremona and J. A. Brandon, AS Oct. 92, p442-449.

Impact loads
Hypervelocity Impact Penetration Phenomena in Aluminum Space Structures, William P. Schonberg, AS July 90, p173-185.

Impact tests
Hypervelocity Impact Penetration Phenomena in Aluminum Space Structures, William P. Schonberg, AS July 90, p173-185.

In situ tests
Geotechnical Investigation Strategies for Lunar Base, Dan A. Brown and Glenn Rix, AS Apr. 92, p199-213.

Inflatable structures
Geometric Modeling of Inflatable Structures for Lunar Base, Paul S. Nowak, Willy Z. Sadeh and Loretta A. Morroni, AS July 92, p311-322.

Mechanical Equipment Requirements for Inflatable Lunar Structures, James M. Hines, Craig E. Miller and Richard M. Drake, AS Apr. 92, p248-256.

Interactions
Isssues in Developing Control Zones for International Space Operations, Blair A. Nader and Kumar Krishen, AS Oct. 92, p387-404.

International compacts
Isssues in Developing Control Zones for International Space Operations, Blair A. Nader and Kumar Krishen, AS Oct. 92, p387-404.

International factors
Isssues in Developing Control Zones for International Space Operations, Blair A. Nader and Kumar Krishen, AS Oct. 92, p387-404.

Laminates
Design/Control Optimization of Cross-Ply Laminates under Buckling and Vibration, J. M. Sloss, I. S. Sadek, J. C. Bruch, Jr. and S. Adali, AS Jan. 92, p127-137.

Postbuckling Response Simulations of Laminated Anisotropic Panels, Ahmed K. Noor, James H. Starnes, Jr. and W. Allen Waters, Jr., AS July 92, p347-368.

Simultaneous Design and Control of Stiffened Laminated Composite Structures, Luis Mesquita and Manohar P. Kamat, AS Jan. 92, p111-126.

Transverse Shear Effect on Flutter of Composite Panels, Le-Chung Shiau and Jing-Tang Chang, AS Oct. 92, p465-479.

Large structures
Graph-Theory Approach to Eigenvalue Problem of Large Space Structures, A. S. S. R. Reddy, AS Jan. 92, p70-78.

Launching
Optimizing Launch-on-Time Probability, George W. Morgenthaler, AS July 92, p369-386.

Manpower
Construction of Pressurized, Self-Supporting Membrane Structure on Moon, Philip Y. Chow, AS July 92, p274-281.

Materials
Support Structures for High-Resolution Optical Systems, Ralph M. Richard and Daniel Vukobratovich, AS Jan. 92, p24-43.

Materials, properties
Behavior of Compacted Lunar Simulants Using New Vacuum Triaxial Device, Chandra S. Desai, Hamid Saadatmanesh and Thomas Allen, AS Oct. 92, p425-441.

Membranes
Construction of Pressurized, Self-Supporting Membrane Structure on Moon, Philip Y. Chow, AS July 92, p274-281.

Meteorology
BEST: New Satellite Mission Dedicated to Tropical System Energy Budget, M. Orgeret, AS Jan. 92, p1-11.

Meteors
Projectile Shape and Material Effects in Hypervelocity Impact Response of Dual-Wall Structures, William P. Schonberg and Kent Darzi, AS Oct. 92, p405-424.

Mirrors
Support Structures for High-Resolution Optical Systems, Ralph M. Richard and Daniel Vukobratovich, AS Jan. 92, p24-43.

Modal analysis
Modal Identification Algorithm with Unmeasured Input, C. F. Cremona and J. A. Brandon, AS Oct. 92, p442-449.

Model accuracy
Model Correction via Compatible Element Method, De-Wen Zhang and F. S. Wei, AS July 92, p337-346.

Model studies
Model Correction via Compatible Element Method, De-Wen Zhang and F. S. Wei, AS July 92, p337-346.

Modeling
Geometric Modeling of Inflatable Structures for Lunar Base, Paul S. Nowak, Willy Z. Sadeh and Loretta A. Morroni, AS July 92, p311-322.

Modeling Effects of Chemical Explosives for Excavation on Moon, Deborah J. Goodings, Chaun-Ping Lin, Richard D. Dick, William L. Fourney and Leonhard E. Bernold, AS Jan. 92, p44-58.

Moon
Behavior of Compacted Lunar Simulants Using New Vacuum Triaxial Device, Chandra S. Desai, Hamid Saadatmanesh and Thomas Allen, AS Oct. 92, p425-441.

Cable Structures and Lunar Environment, Mohammed Ettouney, Haym Benaroya and Nissim Agassi, AS July 92, p297-310.

Concept Evaluation Methodology for Extraterrestrial Habitats, Richard M. Drake and Philip J. Richter, AS July 92, p282-296.

Construction of Pressurized, Self-Supporting Membrane Structure on Moon, Philip Y. Chow, AS July 92, p274-281.

Design and Construction Considerations for Lunar Outpost, H. Benaroya and M. Ettouney, AS July 92, p261-273.

Engineering Issues for Early Lunar-Based Telescopes, Stewart W. Johnson, Jack O. Burns, Koon Meng Chua and John P. Wetzel, AS July 92, p323-336.

Framework for Evaluation of Lunar Base Structural Concepts, Haym Benaroya and Mohammed Ettouney, AS Apr. 92, p187-198.

Geometric Modeling of Inflatable Structures for Lunar Base, Paul S. Nowak, Willy Z. Sadeh and Loretta A. Morroni, AS July 92, p311-322.

Geotechnical Investigation Strategies for Lunar Base, Dan A. Brown and Glenn Rix, AS Apr. 92, p199-213.

Indigenous Resource Utilization in Design of Advanced Lunar Facility, Larry S. Bell, Michael G. Fahey, Todd K. Wise and Paul C. Spana, AS Apr. 92, p230-247.

Mechanical Equipment Requirements for Inflatable Lunar Structures, James M. Hines, Craig E. Miller and Richard M. Drake, AS Apr. 92, p248-256.

Modeling Effects of Chemical Explosives for Excavation on Moon, Deborah J. Goodings, Chaun-Ping Lin, Richard D. Dick, William L. Fourney and Leonhard E. Bernold, AS Jan. 92, p44-58.

Overview of Existing Lunar Base Structural Concepts, Task Committee on Lunar Base Structures, AS Apr. 92, p159-174.

Regolith Mechanics, Dynamics, and Foundations, Mohammed M. Ettouney and Haym Benaroya, AS Apr. 92, p214-229.

Structural Design of Lunar Radio Telescope Using Interactive CAD, Ferhat Akgul, Walter H. Gerstle and Stewart W. Johnson, AS Jan. 92, p12-23.

Technical Issues for Lunar Base Structures, Brent Sherwood and Larry Toups, AS Apr. 92, p175-186.

Use of Explosives on the Moon, Richard D. Dick, William L. Fourney, Deborah J. Goodings, Chaun-Ping Lin and Leonhard E. Bernold, AS Jan. 92, p59-69.

Multiple objective analysis

Design/Control Optimization of Cross-Ply Laminates under Buckling and Vibration, J. M. Sloss, I. S. Sadek, J. C. Bruch, Jr. and S. Adali, AS Jan. 92, p127-137.

Nonlinear analysis

Analysis of Thick Circular Plates Undergoing Large Deflections, M. Gorji, J. A. Abuyan and K. S. Y. Li, AS Jan. 92, p138-153.

Nonlinear programming

Simultaneous Design and Control of Stiffened Laminated Composite Structures, Luis Mesquita and Manohar P. Kamat, AS Jan. 92, p111-126.

Numerical models

Postbuckling Response Simulations of Laminated Anisotropic Panels, Ahmed K. Noor, James H. Starnes, Jr. and W. Allen Waters, Jr., AS July 92, p347-368.

Optimal design

Design/Control Optimization of Cross-Ply Laminates under Buckling and Vibration, J. M. Sloss, I. S. Sadek, J. C. Bruch, Jr. and S. Adali, AS Jan. 92, p127-137.

Framework for Evaluation of Lunar Base Structural Concepts, Haym Benaroya and Mohammed Ettouney, AS Apr. 92, p187-198.

Simultaneous Design and Control of Stiffened Laminated Composite Structures, Luis Mesquita and Manohar P. Kamat, AS Jan. 92, p111-126.

Optimization

Concurrent Optimization of Large Structures. I: Algorithms, Hojjat Adeli and Osama Kamal, AS Jan. 92, p79-90.

Concurrent Optimization of Large Structures. II. Applications, Hojjat Adeli and Osama Kamal, AS Jan. 92, p91-110.

Optimizing Launch-on-Time Probability, George W. Morgenthaler, AS July 92, p369-386.

Orthotropic plate

Analysis of Thick Circular Plates Undergoing Large Deflections, M. Gorji, J. A. Abuyan and K. S. Y. Li, AS Jan. 92, p138-153.

Panels

Postbuckling Response Simulations of Laminated Anisotropic Panels, Ahmed K. Noor, James H. Starnes, Jr. and W. Allen Waters, Jr., AS July 92, p347-368.

Transverse Shear Effect on Flutter of Composite Panels, Le-Chung Shiau and Jing-Tang Chang, AS Oct. 92, p465-479.

Parallel processing

Concurrent Optimization of Large Structures. I: Algorithms, Hojjat Adeli and Osama Kamal, AS Jan. 92, p79-90.

Concurrent Optimization of Large Structures. II. Applications, Hojjat Adeli and Osama Kamal, AS Jan. 92, p91-110.

Penetration resistance

Hypervelocity Impact Penetration Phenomena in Aluminum Space Structures, William P. Schonberg, AS July 90, p173-185.

Penetration tests

Geotechnical Investigation Strategies for Lunar Base, Dan A. Brown and Glenn Rix, AS Apr. 92, p199-213.

Plates

Analysis of Thick Circular Plates Undergoing Large Deflections, M. Gorji, J. A. Abuyan and K. S. Y. Li, AS Jan. 92, p138-153.

Simultaneous Design and Control of Stiffened Laminated Composite Structures, Luis Mesquita and Manohar P. Kamat, AS Jan. 92, p111-126.

Postbuckling behavior

Postbuckling Response Simulations of Laminated Anisotropic Panels, Ahmed K. Noor, James H. Starnes, Jr. and W. Allen Waters, Jr., AS July 92, p347-368.

Precipitation, atmospheric

BEST: New Satellite Mission Dedicated to Tropical System Energy Budget, M. Orgeret, AS Jan. 92, p1-11.

Probabilistic models

Optimizing Launch-on-Time Probability, George W. Morgenthaler, AS July 92, p369-386.

Productivity
Construction of Pressurized, Self-Supporting Membrane Structure on Moon, Philip Y. Chow, AS July 92, p274-281.

Professional role
Engineering Issues for Early Lunar-Based Telescopes, Stewart W. Johnson, Jack O. Burns, Koon Meng Chua and John P. Wetzel, AS July 92, p323-336.

Projectile impact
Hypervelocity Impact Penetration Phenomena in Aluminum Space Structures, William P. Schonberg, AS July 90, p173-185.

Projectile Shape and Material Effects in Hypervelocity Impact Response of Dual-Wall Structures, William P. Schonberg and Kent Darzi, AS Oct. 92, p405-424.

Projectiles
Hypervelocity Impact Penetration Phenomena in Aluminum Space Structures, William P. Schonberg, AS July 90, p173-185.

Radar
Structural Design of Lunar Radio Telescope Using Interactive CAD, Ferhat Akgul, Walter H. Gerstle and Stewart W. Johnson, AS Jan. 92, p12-23.

Resource management
Indigenous Resource Utilization in Design of Advanced Lunar Facility, Larry S. Bell, Michael G. Fahey, Todd K. Wise and Paul C. Spana, AS Apr. 92, p230-247.

Sandwich panels
Effects of Bonding Stiffness on Thermal Stresses in Sandwich Panels, R. Hussein, P. Fazio and K. Ha, AS Oct. 92, p480-490.

Satellites
BEST: New Satellite Mission Dedicated to Tropical System Energy Budget, M. Orgeret, AS Jan. 92, p1-11.

Seismic analysis
Geotechnical Investigation Strategies for Lunar Base, Dan A. Brown and Glenn Rix, AS Apr. 92, p199-213.

Sensitivity analysis
Postbuckling Response Simulations of Laminated Anisotropic Panels, Ahmed K. Noor, James H. Starnes, Jr. and W. Allen Waters, Jr., AS July 92, p347-368.

Shear deformation
Analysis of Thick Circular Plates Undergoing Large Deflections, M. Gorji, J. A. Abuyan and K. S. Y. Li, AS Jan. 92, p138-153.

Simulation
Modeling Effects of Chemical Explosives for Excavation on Moon, Deborah J. Goodings, Chaun-Ping Lin, Richard D. Dick, William L. Fourney and Leonhard E. Bernold, AS Jan. 92, p44-58.

Use of Explosives on the Moon, Richard D. Dick, William L. Fourney, Deborah J. Goodings, Chaun-Ping Lin and Leonhard E. Bernold, AS Jan. 92, p59-69.

Site evaluation
Geotechnical Investigation Strategies for Lunar Base, Dan A. Brown and Glenn Rix, AS Apr. 92, p199-213.

Soil dynamics
Regolith Mechanics, Dynamics, and Foundations, Mohammed M. Ettouney and Haym Benaroya, AS Apr. 92, p214-229.

Soil investigations
Geotechnical Investigation Strategies for Lunar Base, Dan A. Brown and Glenn Rix, AS Apr. 92, p199-213.

Soil mechanics
Regolith Mechanics, Dynamics, and Foundations, Mohammed M. Ettouney and Haym Benaroya, AS Apr. 92, p214-229.

Soils
Modeling Effects of Chemical Explosives for Excavation on Moon, Deborah J. Goodings, Chaun-Ping Lin, Richard D. Dick, William L. Fourney and Leonhard E. Bernold, AS Jan. 92, p44-58.

Use of Explosives on the Moon, Richard D. Dick, William L. Fourney, Deborah J. Goodings, Chaun-Ping Lin and Leonhard E. Bernold, AS Jan. 92, p59-69.

Space exploration
Behavior of Compacted Lunar Simulants Using New Vacuum Triaxial Device, Chandra S. Desai, Hamid Saadatmanesh and Thomas Allen, AS Oct. 92, p425-441.

Hypervelocity Impact Penetration Phenomena in Aluminum Space Structures, William P. Schonberg, AS July 90, p173-185.

Projectile Shape and Material Effects in Hypervelocity Impact Response of Dual-Wall Structures, William P. Schonberg and Kent Darzi, AS Oct. 92, p405-424.

Technical Issues for Lunar Base Structures, Brent Sherwood and Larry Toups, AS Apr. 92, p175-186.

Space stations
Isssues in Developing Control Zones for International Space Operations, Blair A. Nader and Kumar Krishen, AS Oct. 92, p387-404.

Projectile Shape and Material Effects in Hypervelocity Impact Response of Dual-Wall Structures, William P. Schonberg and Kent Darzi, AS Oct. 92, p405-424.

Space structures
Cable Structures and Lunar Environment, Mohammed Ettouney, Haym Benaroya and Nissim Agassi, AS July 92, p297-310.

Concept Evaluation Methodology for Extraterrestrial Habitats, Richard M. Drake and Philip J. Richter, AS July 92, p282-296.

Concurrent Optimization of Large Structures. I: Algorithms, Hojjat Adeli and Osama Kamal, AS Jan. 92, p79-90.

Concurrent Optimization of Large Structures. II. Applications, Hojjat Adeli and Osama Kamal, AS Jan. 92, p91-110.

Construction of Pressurized, Self-Supporting Membrane Structure on Moon, Philip Y. Chow, AS July 92, p274-281.

Design and Construction Considerations for Lunar Outpost, H. Benaroya and M. Ettouney, AS July 92, p261-273.

Engineering Issues for Early Lunar-Based Telescopes, Stewart W. Johnson, Jack O. Burns, Koon Meng Chua and John P. Wetzel, AS July 92, p323-336.

Geometric Modeling of Inflatable Structures for Lunar Base, Paul S. Nowak, Willy Z. Sadeh and Loretta A. Morroni, AS July 92, p311-322.

Graph-Theory Approach to Eigenvalue Problem of Large Space Structures, A. S. S. R. Reddy, AS Jan. 92, p70-78.

Hypervelocity Impact Penetration Phenomena in Aluminum Space Structures, William P. Schonberg, AS July 90, p173-185.

Mechanical Equipment Requirements for Inflatable Lunar Structures, James M. Hines, Craig E. Miller and Richard M. Drake, AS Apr. 92, p248-256.

Projectile Shape and Material Effects in Hypervelocity Impact Response of Dual-Wall Structures, William P. Schonberg and Kent Darzi, AS Oct. 92, p405-424.

Spacecraft

Hypervelocity Impact Penetration Phenomena in Aluminum Space Structures, William P. Schonberg, AS July 90, p173-185.

Optimizing Launch-on-Time Probability, George W. Morgenthaler, AS July 92, p369-386.

Spacecraft launching sites

Optimizing Launch-on-Time Probability, George W. Morgenthaler, AS July 92, p369-386.

Stability

Time-Delay Effect on Dynamic Response of Actively Controlled Structures, Surjit S. Dhillon and William C. Lennox, AS Oct. 92, p450-464.

Stiffening

Simultaneous Design and Control of Stiffened Laminated Composite Structures, Luis Mesquita and Manohar P. Kamat, AS Jan. 92, p111-126.

Structural analysis

Concurrent Optimization of Large Structures. I: Algorithms, Hojjat Adeli and Osama Kamal, AS Jan. 92, p79-90.

Concurrent Optimization of Large Structures. II. Applications, Hojjat Adeli and Osama Kamal, AS Jan. 92, p91-110.

Structural control

Time-Delay Effect on Dynamic Response of Actively Controlled Structures, Surjit S. Dhillon and William C. Lennox, AS Oct. 92, p450-464.

Vibration Control of Beams with Embedded Smart Composite Material, M. Arockiasamy, P. S. Neelakanta and G. Sreenivasan, AS Oct. 92, p492-498.

Structural design

Concept Evaluation Methodology for Extraterrestrial Habitats, Richard M. Drake and Philip J. Richter, AS July 92, p282-296.

Construction of Pressurized, Self-Supporting Membrane Structure on Moon, Philip Y. Chow, AS July 92, p274-281.

Framework for Evaluation of Lunar Base Structural Concepts, Haym Benaroya and Mohammed Ettouney, AS Apr. 92, p187-198.

Indigenous Resource Utilization in Design of Advanced Lunar Facility, Larry S. Bell, Michael G. Fahey, Todd K. Wise and Paul C. Spana, AS Apr. 92, p230-247.

Mechanical Equipment Requirements for Inflatable Lunar Structures, James M. Hines, Craig E. Miller and Richard M. Drake, AS Apr. 92, p248-256.

Technical Issues for Lunar Base Structures, Brent Sherwood and Larry Toups, AS Apr. 92, p175-186.

Structural members

Geometric Modeling of Inflatable Structures for Lunar Base, Paul S. Nowak, Willy Z. Sadeh and Loretta A. Morroni, AS July 92, p311-322.

Structures

Framework for Evaluation of Lunar Base Structural Concepts, Haym Benaroya and Mohammed Ettouney, AS Apr. 92, p187-198.

Support Structures for High-Resolution Optical Systems, Ralph M. Richard and Daniel Vukobratovich, AS Jan. 92, p24-43.

Subsurface investigations

Geotechnical Investigation Strategies for Lunar Base, Dan A. Brown and Glenn Rix, AS Apr. 92, p199-213.

Supports

Support Structures for High-Resolution Optical Systems, Ralph M. Richard and Daniel Vukobratovich, AS Jan. 92, p24-43.

Telescopes

Engineering Issues for Early Lunar-Based Telescopes, Stewart W. Johnson, Jack O. Burns, Koon Meng Chua and John P. Wetzel, AS July 92, p323-336.

Structural Design of Lunar Radio Telescope Using Interactive CAD, Ferhat Akgul, Walter H. Gerstle and Stewart W. Johnson, AS Jan. 92, p12-23.

Support Structures for High-Resolution Optical Systems, Ralph M. Richard and Daniel Vukobratovich, AS Jan. 92, p24-43.

Temperature effects

Effects of Bonding Stiffness on Thermal Stresses in Sandwich Panels, R. Hussein, P. Fazio and K. Ha, AS Oct. 92, p480-490.

Tension structures

Cable Structures and Lunar Environment, Mohammed Ettouney, Haym Benaroya and Nissim Agassi, AS July 92, p297-310.

Thermal stresses

Effects of Bonding Stiffness on Thermal Stresses in Sandwich Panels, R. Hussein, P. Fazio and K. Ha, AS Oct. 92, p480-490.

Traffic management

Isssues in Developing Control Zones for International Space Operations, Blair A. Nader and Kumar Krishen, AS Oct. 92, p387-404.

Transverse shear

Transverse Shear Effect on Flutter of Composite Panels, Le-Chung Shiau and Jing-Tang Chang, AS Oct. 92, p465-479.

Triaxial tests

Behavior of Compacted Lunar Simulants Using New Vacuum Triaxial Device, Chandra S. Desai, Hamid Saadatmanesh and Thomas Allen, AS Oct. 92, p425-441.

Tropical regions

BEST: New Satellite Mission Dedicated to Tropical System Energy Budget, M. Orgeret, AS Jan. 92, p1-11.

Trusses

Concurrent Optimization of Large Structures. I: Algorithms, Hojjat Adeli and Osama Kamal, AS Jan. 92, p79-90.

Concurrent Optimization of Large Structures. II. Applications, Hojjat Adeli and Osama Kamal, AS Jan. 92, p91-110.

Velocity

Hypervelocity Impact Penetration Phenomena in Aluminum Space Structures, William P. Schonberg, AS July 90, p173-185.

Vibration

Design/Control Optimization of Cross-Ply Laminates under Buckling and Vibration, J. M. Sloss, I. S. Sadek, J. C. Bruch, Jr. and S. Adali, AS Jan. 92, p127-137.

Modal Identification Algorithm with Unmeasured Input, C. F. Cremona and J. A. Brandon, AS Oct. 92, p442-449.

Vibration control

Vibration Control of Beams with Embedded Smart Composite Material, M. Arockiasamy, P. S. Neelakanta and G. Sreenivasan, AS Oct. 92, p492-498.

Wave propagation

Regolith Mechanics, Dynamics, and Foundations, Mohammed M. Ettouney and Haym Benaroya, AS Apr. 92, p214-229.

Wind

BEST: New Satellite Mission Dedicated to Tropical System Energy Budget, M. Orgeret, AS Jan. 92, p1-11.
